Eliminating Global Boundries, Inc. since 1994

Service: **egb** provides services tailored 1.) to each stage of your product life cycle and 2.) adaptive to your procurement process/requirements.

1.) Solutions for each stage of your product life-cycle from

- Global sourcing and second-sourcing,
- on-time launch and flawless ramp-up,
- material cost reduction, or delivery enhancements, all the way to green end-of-life disposition.

2.) We apply our services as needed, whether you are looking for,

- permanent procurement or supply scheduling,
- one-time acquisitions (to mitigate unforeseen risks,)
- value-added services, (functional testing, T&R, etc.)
- ad hoc services.

Services to Execute your Strategies:

Global Sourcing Services, assist you fulfill demand for either low-mix/ high-volume BOMs or high-mix/low-volume RFPs by locating the best mix of solutions from across the globe.

Global Procurement Services, where we become part of your team to assist you execute your procurement strategy through our multi- regional approach or focusing on a core competency to complement & collaborate with your team's.

Inventory Management Services assist you optimize your inventories with the highest level of confidentiality. Beyond using industry-standard arrangements, we offer flexibility to match your resources & go-to-market approaches.

Ad Hoc Services solutions custom-designed through consultation and collaboration.

Since 1994, **egb** is in the flow of technology movements and can facilitate your business with customized go-to market approaches bringing select product category expertise, a multi-regional expertise, and giving anonymity to your strategies in the global village.

Quality from start to finish

egb has made strategic investments in equipment to ensure only quality products are delivered to clients. Quality process starts from sourcing and ends with a check-in after delivery.

egb proactively reviews the supply chain in real-time – tracking industry and international agencies for a list of trigger activities.

First modus operandi is to purchase from factory direct channels.

Any deviation from this standard occurs only in collaboration with our client.

The more exacting the assignment the more transparent .

Upon arrival all inventory is photographed and inspected in compliance with ERAI Top Ten Inspection Reporting including the integrity of the original factory seals with all date codes and lot numbers logged into our database for traceability. Any deviation triggers a series of events with feedback logged.

When applicable, product's material content is verified to be RoHS compliant according to industry standard practices.

All product is warehoused in an air conditioned environment with humidity control, and all handling occurs under strict antistatic ESD controlled conditions.

egb adheres to the following standards ISO 9002, ESD S20.20, C-TPAT, ERAI, MIL-STD-883 (Method 2015.13), JEDEC (JESD22-B107C)

Environmentally Friendly

egb is committed to a quality environment starting with preservation. Our Sourcing Tier Management System gives preference to partners who uphold environmentally conscious standards. We have several initiatives to sustain our commitment to the environment and to aid in the wellness of our planet. Visit us at www.egbinc.com/green.html
